

Paulo Henrique Cuchi

Software Engineer

paulo@cuchi.me | cuchi.me | github.com/cuchi | linkedin.com/in/pcuchi

Summary

Software engineer with 10+ years of experience in backend web development, technical leadership, and DevOps. Passionate about building reliable, maintainable systems using the best tools for the job. Experienced with Ruby on Rails, Node.js, TypeScript, Rust, Go, and cloud infrastructure (AWS, Kubernetes).

Skills & Technologies

- Backend web development
- Technical leadership & mentorship
- DevOps culture, processes & tools
- Unix-based tools and systems
- Cloud infrastructure (AWS, Kubernetes, Terraform)
- CI/CD pipelines (GitHub Actions, CircleCI)
- Ruby / Ruby on Rails
- TypeScript / Node.js
- Rust
- Go
- Python / Django
- Java

Experience

Sr. Software Engineer — Trusted Health

Jan 2022 – Jun 2026 · 4y 5m

- In the main product team, worked on migrating compensation logic from a legacy system (Airtable) into native application code (Ruby on Rails).
- Moved to the infrastructure team, where I built CLI tools (Ruby / Thor) to help the engineering team with their daily tasks.
- Worked on cost optimization across CI/CD pipelines (GitHub, CircleCI), monitoring (New Relic, Sentry, Mezmo) and infrastructure resources (AWS).
- Migrated application compute from Heroku to AWS EKS, and built tooling to improve the developer experience around deploying and debugging Kubernetes pods. Tools used: Kubernetes, ArgoCD, Helm, Terraform & Ruby.
- Worked on a product team developing features for a business-facing web application.

Sr. Software Engineer — Magrathea Labs

Mar 2020 – Jan 2022 · 1y 10m

- Worked on a data intensive web application that collects and displays reports for animal production corporations. The main technologies used were Python, Django, PostgreSQL, Redis, Elasticsearch and Angular.
- Worked as a tech lead of a forked subset of the project above. This new project had international stakeholders who shared regular follow-ups with our development team.
- Provided technical mentorship to employees on the projects we had in common.
- Worked on an internal project of the company that employees used to make appointments managed by HR. The stack of this project was Node.js, TypeScript, React and PostgreSQL.

Software Engineer — NG Informática — TOTVS Software Partner

May 2016 – Mar 2020 · 3y 10m

- Worked on the development of an Android application for asset maintenance execution & management.
- Worked on an experimental web application for notifications & alerts written in Node.js & MongoDB.
- Worked as a back-end tech lead for a SaaS web application using Node.js, TypeScript, GraphQL & PostgreSQL.
- Worked on the research of new tools and methods to improve the DevOps cycle of the organization's SaaS products.

Software Engineer — ContaAzul

Oct 2015 – Mar 2016 · 5m

- Worked on a web service for accounting routines & integration using Java EE 7, Hibernate, JBoss & PostgreSQL.

Technical Support — UDESC

Jul 2012 – Jul 2013 · 1y

- Worked on the maintenance of a high-traffic website using HTML, JS, PHP & MySQL.

Education

Systems Analysis and Development — UDESC

2016 – 2018

Computer Science (incomplete) — UDESC

2012 – 2016

Web Development — SENAI

2010 – 2012
